## Description:

The great critic presents his personal selection, with commentary, of the finest poems in the English language. This comprehensive anthology attempts to give the common reader possession of six centuries of great British and American poetry. The book features a large introductory essay

by Harold Bloom called *The Art of Reading Poetry*, which presents his critical reflections of more than half a century devoted to the reading, teaching, and writing about the literary achievement he loves most. In the case of all major poets in the language, this volume offers either the entire range of what is most valuable in their work, or vital selections that illuminate each figure's contribution. There are also headnotes by Harold Bloom to every poet in the volume as well as to the most important individual poems. Much more than any other anthology ever gathered, this book provides readers who desire the pleasures of a sublime art with very nearly everything they need in a single volume. It also is regarded by its editor as his final meditation upon all those who have formed his mind.

A book to buy and read for anyone interested at all in the highest arts of the written English language. Dr. Bloom, a person with a higher level of knowledge and pure intellect than almost all, has brought together many of the great poems of our civilization. While I did not understand all he said in his introductions, there is no doubt he is a treasure of our society. I am not someone who normally reads poetry. This book gave me access to works by poets (many I had not even heard of) that I would never have read otherwise---which would have been my sad loss.
